DIFFERENT PATTERNS OF IP CAMERAS

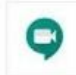

TIME AND ATTENDANCE MANAGEMENT SYSTEM

Time and Attendance Management System" is a comprehensive software solution designed to streamline and automate the tracking of employee work hours, attendance, and related data within a company. It helps businesses effectively manage employee scheduling, monitor attendance, track leaves, and generate accurate payroll reports. This system enhances operational efficiency, reduces errors, and ensures compliance with labor regulations, ultimately contributing to improved productivity and cost savings for the organization.

Time and Attendance is also used educational system to monitor the attendance of students , staffs and it has other features which do benefit the educational board.

CORE					Integrations

Grade Book	LMS	Quiz - Anti Cheating	OMR	IOS App	Stock	CRM	
Management				Communicate			
							
Campus	Transportation	Placement	Parent Login	E-mail Marketing	Forum	Survey	Blog

ACCESS CONTROL SOLUTIONS

"Access Control Solutions" refer to a range of technologies and systems designed to manage and restrict entry to physical spaces or digital resources within a company. These solutions include electronic keycard systems, biometric scanners, and software-based access controls. By implementing access control solutions, businesses can enhance security, prevent unauthorized access, and track employee movements. This leads to improved safety, compliance with regulations, and protection of sensitive information and assets.

CCTV

Implementing a comprehensive Security System, including IP surveillance, ensures the safety and protection of assets, premises, and personnel. Our advanced IP surveillance system utilizes cutting-edge technology to monitor, detect, and deter security threats effectively. With remote access capabilities, real-time alerts, and high-definition video recording, our Security System provides peace of mind and enables proactive security management for businesses of all sizes.

NETWORK INFRASTRUCTURE, DESIGN, IMPLEMENTATION AND ADMINISTRATION

Network Infrastructure Design, Implementation, and Administration" involves the planning, deployment, and management of a company's network architecture. This encompasses designing robust network layouts, installing hardware and software components, and overseeing day-to-day network operations. By expertly managing network infrastructure, businesses ensure reliable connectivity, optimal performance, and secure data transmission. This fosters seamless communication, efficient collaboration, and enables the organization to adapt to evolving technological needs and challenges.

ICT HARDWARE SUPPLY AND INSTALLATION

"ICT Hardware Supply and Installation" specializes in providing comprehensive solutions for acquiring and setting up computer hardware equipment. This includes sourcing high-quality hardware components tailored to the client's needs, and expertly installing and configuring them for seamless integration into their infrastructure. With a focus on reliability and efficiency, the company ensures smooth operations and optimal performance for its clients' IT systems.

SMART HOME SYSTEMS

Smart Home Systems" offers cutting-edge solutions in home automation, including smart audio, air conditioning switches, and light switches. Our technology seamlessly integrates with existing home infrastructure, allowing users to control audio, lighting, and climate settings remotely via mobile devices or voice commands. With a commitment to convenience, energy efficiency, and comfort, we provide tailored smart home solutions that enhance the living experience for our customers.
